teddersjacob.github.io/portfolio

Product Manager focused on AI-enabled and analytics-driven SaaS products. Able to lead initiatives from discovery through launch, using structured experimentation and data to prioritize scalable, high-impact solutions. Known for aligning engineering, design, and business stakeholders to drive adoption, operational efficiency, and product performance.

PROFESSIONAL EXPERIENCE

Product Manager Intern

The Church of Jesus Christ of Latter-day Saints | SLC, UT | Feb 2025 – Mar 2026

Own product strategy and execution for AI-enabled operational tools, leading cross-functional teams across engineering and design to deliver scalable solutions.

- Led end-to-end launch of AI support chatbot, defining KPIs and validating through user testing; reducing manual support volume by ~70%
- Prioritized and delivered API-driven workflow automation, increasing user satisfaction by 30% and accelerating processing efficiency

MBA Student Product Consultant

David Eccles School of Business | Salt Lake City, UT | Aug 2024 – Dec 2025

Collaborated with global businesses to deliver strategic insights and data analysis that shaped new product launches.

Innovation for Justice (i4J):

- Drove discovery to redesign Wisconsin's restraining order process, translating user research into validated product requirements
- Prototyped a redesigned application flow by drafting PRD, creating prototypes using Figma, and running UAT sessions to validate solution

Enhanced Ai:

- Delivered insights from market and user research, shaping product strategy for AI workflow automator and updating roadmap for 2026 Japan launch

Technical Project Manager

Qualtrics | Provo, UT | Sept 2021 – Mar 2024

Led end-to-end implementation of enterprise analytics software, translating client requirements into technical delivery across engineering, design, and research teams.

- Translated enterprise needs into scalable configurations across 23 deployments (up to \$2.3M), informing product requirements and platform standardization
- Defined requirements and partnered with engineering to design and launch global analytics dashboard, reclaiming \$1.7M in margin erosion and reducing U.S. labor costs by \$245K quarterly
- Owned financial performance across implementations, maintaining 40%+ margins through data-driven cost modeling and workflow optimization
- Drove 33% uplift in product satisfaction by introducing support articles, office hours, and regional product champions to drive global adoption
